**SCALE FOR PROJECT SWIFTY COMPANION**  
**(/PROJECTS/SWIFTY-COMPANION)**

You should evaluate 1 student in this team

Git repository

vogsphere@vgs.42.us.or 

---

## Introduction

To ensure this evaluation goes smoothly, please respect the following set of rules :

- Please remain courteous, polite, respectful and constructive at all times during this exchange. The trust bond between the school's community and yourself depends on it.
- Should you notice any malfunctions within the submitted project, make sure you take the time to discuss those with the student (or group of students) being graded.
- Keep in mind that some subjects can be interpreted differently. If you come accross a situation where the student you're grading has interpreted the subject differently than you, try and judge fairly whether their interpretation is acceptable or not, and grade them accordingly. Our peer-evaluation system can only work if you both take it seriously.

## Guidelines

- You may only evaluate whatever is in the GiT submission directory of the student you are grading.
- Make sure to check wether the GiT submission directory belongs to the student (or group) you're grading, and that it's the right project.

- Make sure no mischievous aliases have been used to trick you into correcting something that is not actually in the official submitted directory.
- Any script created to make this evaluation session easier - whether it was produced by you or the student being graded - must be checked rigorously in order to avoid bad surprises.
- If the student who is grading this project hasn't done the project him/herself yet, he/she must read the whole topic before starting the evaluation session.
- Use the flags available to you on this scale in order to report a submission directory that is empty, non-functional, that contains a norm errors or a case of cheating, etc...  
In this case, the evaluation session ends and the final grade is 0 (or -42, in case of cheating). However, unless the student has cheated, we advise you to go through the project together in order for the two (or more) of you to identify the problems that may have led for this project to fail, and avoid repeating those mistakes for future projects.

## Attachments

-  Subject (<https://cdn.intra.42.fr/pdf/pdf/589/swifty-companion.fr.pdf>)
-  Subject (<https://cdn.intra.42.fr/pdf/pdf/591/swifty-companion.en.pdf>)

## Preliminaries

---

### Preliminary instructions

First check the following items :

- There is something in the git repository
- No cheating, student must be able to explain the code.
- The project is in swift 2.0+ and run with Xcode 7.0+

If an item in this list is not respected, the notation stops. Use the appropriate flag. You are encouraged to continue the discussion but the scale ends now.

 Yes

 No

# First section

Mandatory part

## Compilation

Check that the project compiles and launches the simulator correctly.  
If this is not the case, correction stops.

☒ Yes

☐ No

## Views

Check that at least 2 views are present : a view where you search a login,  
and the other where the dashboard of a user is available.

☒ Yes

☐ No

## API

Check that the most recent 42 API is used.

☒ Yes

☐ No

## Search User

- Check with several logins that everything works  
First with a login student, then with a staff login (like NS or Thor)  
And finally with a login that does not exist (1/3/5 notation).

Rate it from 0 (failed) through 5 (excellent)

## Dashboard -> Profil View

- Verify that users details are present. At least four details  
should be displayed as well as the picture.

Rate it from 0 (failed) through 5 (excellent)

## Dashboard -> Skills

- Make sure the skills are all present with their levels.

☒ Yes☐ No

---

### Dashboard -> Projects

- Make sure the projects of the user are present with their percentages even if the user did not succeed the project.

☒ Yes☐ No

---

### Autolayout

- Check that the application runs on all versions of iphone available under iOS 9+ (iPhone 4s, 5, 5c, 5s, 6, 6plus, 6s, 6s Plus).

☒ Yes☐ No

---

### API Token

- Verify that a token is not created for each request.

☒ Yes☐ No

---

## Bonus Part

---

### Custom Cell

- Customs Cell were used to customize tableView.

☒ Yes☐ No

---

### Bonus

Other bonuses available ? (other information, is it beautiful, ergonomic, etc ...)

Rate it from 0 (failed) through 5 (excellent)

---

## Ratings

**Don't forget to check the flag corresponding to the defense**

✓ Ok

★ Outstanding project

📄 Empty work

📄 Incomplete work

💬 No author file

🐛 Invalid compilation

📄 Norme

🖨 Cheat

💥 Crash

👤 Incomplete group

🚫 Forbidden function

## Conclusion

**Leave a comment on this evaluation**

**Finish evaluation**
